

Your patients will thank you for the comfort of our *Open* MR imaging system...

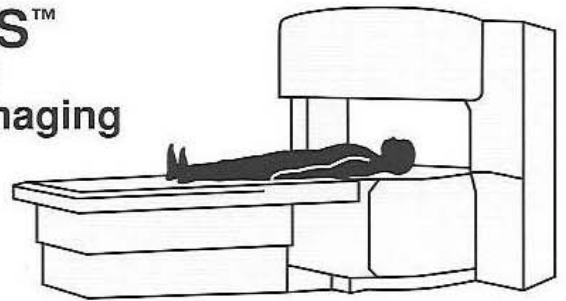

The image quality will speak for itself.

Our new AIRIS™ premium *Open* MR imaging system offers your patient the best of both worlds.

AIRIS™ is *Open* on all sides making it ideal for extremely large and claustrophobic patients. And AIRIS™ features the strongest MR imaging magnet of its kind available, so you are also assured of high resolution images for greater diagnostic potential.

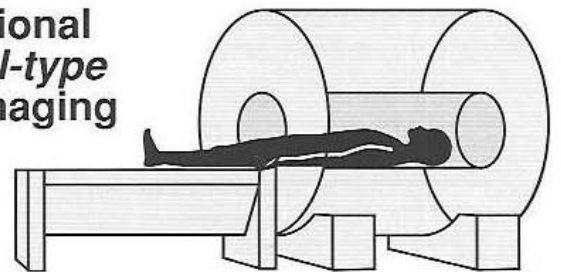

For more information about the many advantages of premium *Open* MR imaging, or to schedule your patient for an appointment, please call:

AIRIS™ *Open* MR imaging

- Strong magnet (0.3 Tesla) for high resolution image quality comparable to tunnel-type systems
- Completely *Open* to eliminate claustrophobia and comfortably accommodate patients of all sizes
- Made by Hitachi, world leader in *Open* MR imaging

Traditional *tunnel-type* MR imaging

- Patient is tightly confined in a narrow tunnel
- Anxiety-related reactions (claustrophobia) are common
- High-strength magnet produces high quality images
